Behavioral Interview Questions Prep Sheet

Below is a list of common questions about key "soft skills" that come up during job interviews, as related in *Cracking the Coding Interview*. Choose two projects you've worked on in the past and fill in the grid answering those questions. Be prepared to talk about the answers you've provided.

	Project 1	Project 2
What was the most challenging aspect of the project?		
What did you learn from the experience?		
What was the hardest bug you encountered?		
What did you enjoy most about the project?		
What was an example of a conflict you had with a teammate? How did you handle it?
